

Breakthrough Seminar

Unlike Anything You've Experienced

Switched-On Management™

Presented by Dr. Jerry V. Teplitz

Personal "Re-Engineering" Makes What Was Once Difficult Easy To Do

The *Switched-On Management* Seminar is a management development program for individuals who are responsible for creating a more effective and dynamic organization. The seminar provides a method for personal re-engineering, which enables managers to adapt quickly and successfully to the changing environment.

The personal technology we use to accomplish this goal is called Educational Kinesiology, which is the process of using specific movement exercises to access untapped capabilities. This allows what was difficult to become easy to do.

The *Switched-On Management* Seminar will strengthen the management skills you already have and give you the mental agility to add to your skills with surprising ease and levels of confidence.

The Switched-On Management Seminar covers the following areas:

Managing Resources

In this mode, the manager defines, discovers, and establishes the boundaries that will best support the fulfillment of the corporate mission and objectives. This is primarily a reflective role. Having established a clear sense of purpose, the "switched-on" manager can then provide assurance, direction, and motivation to her staff and herself.

Planning & Decision-Making

This section deals with the classic managerial functions of planning, organizing, and decision-making.

To increase the reliability of the decision-making process, the manager must be capable of creating

strategies and road maps that assist in recognizing, organizing, and clarifying the alternative choices.

Directing & Problem Solving

Good managers have a highly trained team of networkers on whom they can rely for astute observations and problem-solving contributions. The "switched-on" manager is an excellent negotiator and facilitator. These functions are supported by his ability to relate with people authentically and naturally.

Communication & Team Building

As an effective team builder, the "switched-on" manager functions naturally in a cooperative environment and possesses the personal skills to be an objective participant in team sessions.

Being Productive &

Supporting Company Goals

The manager's function here is to stabilize, support, and nurture the workforce so that workers feel centered and focused on generating the required throughput.

The "switched-on" manager in performance of this role is interested in ensuring that all of his subordinates and/or team members are all moving toward the goal.

Total Quality Management

In this mode, corporate ethics and values are upheld as the company moves through the life-sustaining process of transforming its goods and services into profits. The "switched-on" manager has an inner balance and strength that reflects outwardly, thus providing inspiration to others. The key to this ability is found in sustaining all relationships while in alignment with the manager's core values.

"The process is simple and amazingly effective with proven instant results!"

Patricia Scott, Management Consultant, Guelph, Ontario

"As a result of the 'Switched-On Management' Seminar, I am able to accomplish more in less time ... I've stopped feeling stressed-out by too much to do in too little time. Almost daily, I apply the quick stress management techniques I have learned. I've also gained insights into how I relate to those I manage ... and how the people I manage affect how I feel and behave."

Kay W. Hurley, Director of Membership Services, Tidewater Builders Association, Virginia

"This is an organized, user friendly system. It's excellent."

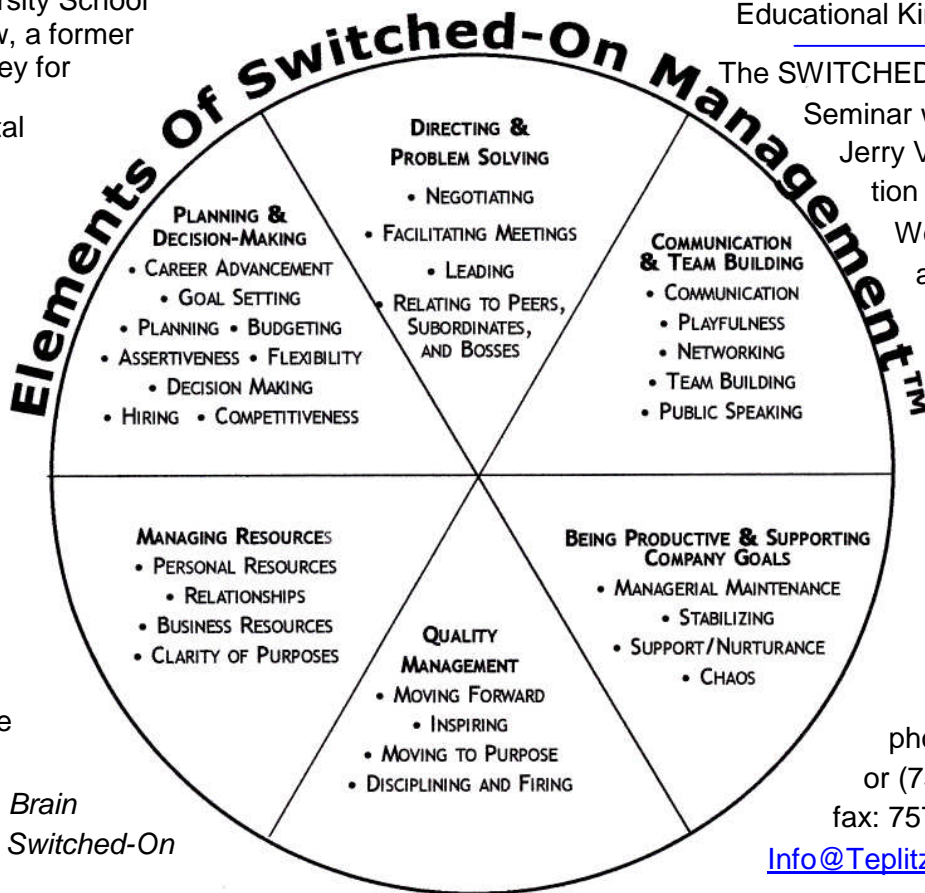

Katherine Marshall, Manager, Dallas, TX
